

The Week at a Glance

Eight modules across five days. Every day builds on the one before it.

DAY 1 Foundations and Mindset	DAY 2 Tools of the Trade	DAY 3 Version Control and Teamwork	DAY 4 Logic and Data	DAY 5 Real Code and Next Steps
I. Introduction to Modern Programming II. Productivity, Focus and Well-Being	III. Development Environments and Technical Efficiency	IV. Software Development Lifecycle and Collaboration	V. Computational Thinking, Data Structures and Algorithms VI. Data Management	VII. Programming Syntax and Logic VIII. Building for the Future
Activities 1-5 no demos	Demos 1-8 Activities 6-7	Demos 9-16 Activities 8-10	Demos 17-26 Activities 11-15	Demos 27-38 Activities 16-20

CivicTrack — one 311 service-request system for the City of Rivervale, seen through a new lens every day: set up its workspace, version-control its documents, model and query its data, write a piece of its logic, then see it whole.

Nothing here assumes you have programmed before. By Friday you will have read, written and run real code.
